

This is a sample basket which shows the products need to fulfill an Axxys-Dek order to cover a straight run of 1.8m with a newel post at each end. Additional items eg. M10 x 160mm bolts, would be needed to fix the newel posts in place. The code numbers shown for each product can be put into our site search to locate them. All timber decking items should be treated with decking oil for added protection.

Qty	Product	Code	Unit Price	Total Price
